### Basic Feline Home Cooked Diet

- 1 Whole Chicken with Giblets
  - ½ Cup Chicken Livers
  - ½ Cup Peas
  - ½ Cup Green Beans
  - ½ Cup Zucchini Squash
  - ½ Cup Carrots
  - ½ Cup Celery
- Vegetables can be frozen or fresh, just do not use canned. Canned vegetables contain high amounts of salt.

Put all the ingredients into a crock pot, including chicken giblets (except the neck.) Fill with fresh water to just cover the chicken. Cover and cook on low for 8 – 10 hours, then let cool.

Remove bones from chicken and ladle stew into a food processor. Process until desired consistency (some cats like it creamy, chunky, or more of a soup or stew like consistency while others like less broth.) Put enough for 2-3 days in fridge, freeze the rest of the food.

At the time of processing you can also add other types of food to make different tasting recipes using the chicken base. After adding chicken stew into food processor you can add: canned sardines, baked whitefish or salmon, hardboiled eggs, cooked beef or turkey.

At the time of feeding, warm food up, add vitamin/mineral supplement (Rx Vitamins Feline Minerals)
