## Recommended High Quality Pet Foods

### **Frozen & Dehydrated Raw**

ANSWERS - raw food that comes in both “straight” (supplemental diet with no vegetables) and “detailed” (complete diet with fermented vegetables.) This high calorie diet is made from organically raised meats and available in multiple single proteins options.

ALL PROVIDE – all-natural raw food for cats and dogs that doesn’t contain synthetic vitamins. Several protein sources available as well as puppy and senior varieties. For those wary about feeding raw, this food can also be cooked.

VITAL ESSENTIALS – prey-model raw diet that works well for animals with allergies as they are complete with meat, bone, and organs, but no fruits, vegetables, or starches.

PRIMAL, DARWIN'S, STELLA & CHEWY'S - all meats, fruits, and vegetables, no grains or starches, comes in many varieties. This is the closest diet to what animals eat in nature and produces minimal stool. Most contain added vitamins and minerals to make a complete diet. Dehydrated options are available for travel or picky eaters but must be rehydrated before feeding.

### **Dehydrated/Pre-mix**

DR. HARVEY’S – three dehydrated vegetable pre-mixes that make complete meals when mixed with hot water, your choice of meat, and oil. Whole grain, low glycemic, and whole food/non-synthetic options to make homemade meals easy.

### **Fresh Cooked**

ALL PROVIDE, PET PLATE, NOM NOM NOW, OLLIES, THE FARMER’S DOG, – fresh, human grade, complete or supplemental homecooked meals delivered directly to your door. Many different options, but not always able to customize to your pet.

### **Canned (or Dry Kibble)**

NATURE’S VARIETY – carrageenan-free canned in many flavors, including a single protein limited ingredient line with rabbit, pork, duck and turkey.

TIKI CAT & DOG – all formulas are human grade whole meat and manufactured in a human food facility in Thailand. Magnesium free and safe for all life stages.

NATURE’S LOGIC – cost effective, all-natural food with no added synthetic vitamins and minerals. Comes in a variety of flavors including rabbit, sardine, venison, duck/salmon, chicken and beef.

ZIWI PEAK – imported from New Zealand, this air-dried jerky type food contains no grains, starches, or potatoes with green lip mussels for joints. The canned varieties come in beef, lamb, venison, or fish/venison.

RAWZ – highly palatable food without any rendered ingredients. 96% canned varieties come in both single protein and multiple protein without any added vegetables, starch, or gums. Their grain free dry food has a high meat content with the first 7 ingredients being meat sources.

N&D (Farmina) – canned varieties contain no industrial gums or thickeners. Kibble has both grain free and ancestral grains lines with chicken, boar, cod, herring, and lamb varieties, made in Italy.
